

## Build on a name you can trust.

As a building professional, you're no doubt familiar with the American Standard Heating & Air Conditioning brand. You may even have installed our equipment in more than a few homes over the years.

But what you may not know is that we were one of the earliest pioneers in developing efficient and reliable home heating. Today, American Standard Heating & Air Conditioning is one of the largest and most trusted manufacturers of innovative home heating and cooling systems. These easy-to-install, quality units are perfect for your new construction and replacement projects, and they're engineered to meet government standards for durability and efficiency.

Rely on American Standard Heating & Air Conditioning for your cooling and heating needs, and you'll truly be building on a name you can trust.

Engineered with quality components that work as hard as you do.

Air Conditioner

### Spine Fin™: The gold standard of efficiency

Most manufacturers use industry-standard coils in their air conditioners and heat pumps. Not American Standard Heating & Air Conditioning. We rely exclusively on the performance-enhancing properties of our unique Spine Fin coil. Constructed with thousands of tiny aluminum fins bonded to continuous aluminum refrigerant tubing, Spine Fin coils have a greater surface area, which leads to greater airflow and heat transfer capabilities. And this patented design is unbeatable in providing retained efficiency over time. That's because Spine Fin coils don't deteriorate or become clogged with debris as easily as industry-standard coils. So your customers will enjoy less energy usage for as long as they own their home.

13 & 14  
SEER

- 1 Spine Fin coil**  
Constructed with thousands of tiny fins, it provides more surface area, adding greater heat transfer capabilities and more efficiency over time.
- 2 Single-speed fan motor**  
Conserves energy and operates quietly, so noise levels are kept to a minimum.
- 3 Steel louvered panels**  
22-gauge galvanized steel louvered panels serve to keep the coil's surface cleaner while protecting it from damaging elements like leaves, tree branches and hail.
- 4 Appliance-grade powder-paint finish**  
Resists rust and scratches, eliminates sharp edges and provides years of lasting protection.
- 5 Durabase™ basepan**  
Will not crack, warp, corrode or rust.
- 6 Duration™ compressor**  
Durable and torture-tested for years of worry-free operation.

### Electronic demand defrost (heat pump only; not shown)

Eliminates unnecessary defrost cycles for energy savings and longer compressor life.

Select American Standard 14 models meet efficiency requirements for the federal energy tax credits\* when matched with certain variable speed indoor units. Visit [www.ahridirectory.org](http://www.ahridirectory.org) for a list of current ratings.

\*Tax credit subject to IRS regulations. Customers should consult a tax professional for advice on tax preparation.

## It's all about choice.

When you give your homebuyers the opportunity to upgrade their home comfort system during the building process, you're helping them achieve their dream home—a home that's completely comfortable, every season of the year. And that's not all. By selecting a higher efficiency system, they could also use less energy for as long as they own their home. That means they'll have comfort and peace of mind from the moment they move in and for many years to come. Ask your independent American Standard Heating & Air Conditioning dealer for details.

## A matched system delivers the highest comfort, efficiency and performance.

Each American Standard Heating & Air Conditioning component is designed and engineered to work seamlessly in what is called a "matched system." A balanced system, matched in SEER and size, is better than installing only one unit. It ensures the homeowner maximum efficiency and reliability.

## Take comfort in our peace-of-mind warranties.

Your investment in an American Standard 13 or 14 air conditioner or heat pump is well protected with limited warranties on the heat exchanger and functional parts.\* Optional Extended Warranties are also available. Extended Warranties can pay for labor and other costs not covered by manufacturer's limited warranty. Ask your dealer for full warranty information at time of purchase. Warranties are for residential use only, some exclusions may apply.

\*Registered Limited Warranty terms are available when you register within 60 days of installation. You can register online at [americanstandardair.com](http://americanstandardair.com) or by phone at 800-554-8005, otherwise American Standard Heating & Air Conditioning's Base Limited Warranty terms will apply. Base Limited Warranty information on specific products can be found on [americanstandardair.com](http://americanstandardair.com).

## American Standard Heating & Air Conditioning benefits for your customers

### Reliable performance

Design innovations and rigorous testing ensure that our name goes on only the most reliable products.

### Durable construction

Materials for all components are torture-tested for consistent, reliable, long-lasting performance and durability.

### Enhanced comfort

Add a variable speed indoor fan motor to decrease sound and increase humidity control and efficiency for maximum comfort.

### Cleaner air

Add an AccuClean™ air cleaner to remove up to 99.98% of airborne allergens from filtered air for a cleaner, more comfortable home.

### Efficient operation

Increased efficiency may reduce customers' home heating and cooling energy consumption.

## More than 100 years of feeling right at home.

When we made our first radiators in the 1880s, indoor heating was an innovation in and of itself. Since then, we've led the way in creating home comfort systems tailored to meet the needs that are most important to you. Whether your highest priority is comfort, efficiency, cleaner air or all of the above – we can help make your home the most comfortable place you've ever been.
